

# 2005 Summer Internship Program

## CCR's Cancer Research Interns in Residence (CRIR)

The **Center for Cancer Research (CCR)**, Office of Training and Education, inaugurated a pilot in 2004 to further embrace diversity among the pool of trainee applicants. The **CCR-Cancer Research Interns in Residence** recruited 40 and placed 28 Summer Interns in laboratories across the CCR. The CCR Office of the Director provided the training dollars and S&S dollars. The CCR also provided housing for students who qualified financially.

For 2005, we have begun recruiting students from colleges, universities, and minority-targeted programs, e.g., the Biomedical Science Careers Program (BSCP) and the Special Populations Network. They come from underrepresented populations and/or disadvantaged backgrounds, i.e., with family income below the income level published in the *Federal Register* (see chart). We will again provide Cancer Research Training Award (CRTA) slots from the CCR Office of the Director (OD). **This program offers development and training in the newest biomedical technologies.**

### HOW TO APPLY

Applications will be accepted (through the NIH Office of Education Web site) after November 15, 2004.

#### Interested students should do the following:

1. Apply on-line at <http://www.training.nih.gov>
2. Send an e-mail to indicate their interest in the program to either:
